PROJECTS

Countries Finder [🔗](#)

[Github](#)

A web application that displays countries, built with HTML, Tailwindcss, and React using rest countries API. It has a toggle-able dark theme, a search bar and can filter countries by region.

Ecommerce product page [🔗](#)

[Github](#)

A responsive single-page website that displays the product details page. It includes a desktop light box gallery, a mobile slider, and a functional cart product page.

Space Tourism [🔗](#)

[Github](#)

A multi-page website built with React, Tailwind, SASS, and React Router. It contains sliders and an animated tab.
