Software Engineer

TECHNICAL SKILLS/TOOLS

Frontend/Design - HTML, CSS, JavaScript, ES6, React, Redux, Tailwindcss, Bootstrap, SASS, Figma,

Backend - Node JS, Express JS, MongoDB, Python, Django

Platforms/Tools - Git/GitHub, API integration, VsCode

WORK EXPERIENCE

Web Developer | [Filly Coder](#) | Remote

SEPT 2022 – Present

- Implemented responsive websites from static designs using JavaScript and its framework (React, Express.js).
- Developed complex web-based applications and integrated with different APIs (YouTube, Instagram)
- Built compatible, custom client dashboard based on provided data.
- Created and built a calendar with input masking and validation for both date selection and input, with a single date option or date range option.

Frontend Developer and Tech Writer | [LD Talents](#) | Remote

FEB 2022 – MARCH 2022

- Implemented responsive websites from static designs.
- Wrote articles on the step-by-step tutorial on different aspects of front-end development.
- Implemented SEO-friendly articles.

PROJECTS

[Sneakers](#) | [GitHub](#)

[View Live](#)

- Created and designed an e-commerce application using MERN stack and Figma respectively.
- Implemented login, and signup, displaying a variety of sneakers to choose from and filter through, and integrated Stripe API for payment.
- Enabled user info, password, and cart update, user address creation and default setting, and user order history review.
- **Stack Used** - HTML/CSS/JavaScript, React/Redux, MongoDB, Node, Express, Stripe API, Framer Motion, Tailwind

[Countries Finder](#) | [GitHub](#)

[View Live](#)

- Created a front-end app using the rest-countries API integration. Used the API to display countries.
- Displays all info about a country when clicked.
- The app contains a toggle-able dark theme, and a search bar, and can filter countries by region.
- **Stack Used** - HTML/CSS/JavaScript, React, Tailwind, API

[To-do App](#) | [GitHub](#)

[View Live](#)

- Generated a simple full-stack app using React and Django to create a to-do list.
- Enabled the ability to create, edit and delete a to-do item, drag and reorder an item, cross out a completed to-do item, and clear out the entire list at once.

- **Stack Used** - HTML/CSS/JavaScript, React, Tailwind, Python, Django

EDUCATION

[Hack Code Camp](#) | Python Language

University of Ilorin | BSc Physiology
