HIKMAH YOUSUPH

Software Developer

Lagos, Nigeria | hikmayousuph@gmail.com | linkedin.com/in/hikmah-yousuph | github.com/hikmahx | hikmah-yousuph.vercel.app

WORK EXPERIENCE

GitRoll   **San Francisco, United States**
Frontend Developer   *Jul 2024 – Aug 2025*
- Designed and delivered core features, including GitRoll's blog, SaaS API dashboard, outreach one-pager, and a custom chat interface for Shrimpy AI, enhancing engagement and usability.
- Implemented responsive, production-ready designs across platforms, ensuring consistency and improved functionality.
- Built an ML-based GitHub issue classifier, providing actionable insights and improving analytics.

StraitPay   **London, United Kingdom**
Full-stack Developer   *Oct 2023 – Mar 2024*
- Collaborated with a cross-functional team to redesign the website, increasing mobile accessibility by 30%.
- Implemented user authentication and wallet features on mobile app and website, boosting user engagement.
- Leveraged MixPanel in mobile app for user analysis, guiding UX enhancements, and feature development.

Co.Lab   **Washington, United States**
Backend Developer   *Nov 2023 – Feb 2024*
- Led the development of the API from project inception, reducing the project timeline by 20%.
- Facilitated daily stand-ups and regular meetings, enhancing team communication and productivity.
- Adapted to changing requirements, resulting in a product that exceeded customer expectations.

Filly Coder   **Accra, Ghana**
Full-stack Developer   *Sep 2022 – Jul 2023*
- Worked with design and development teams to ensure better project implementation.
- Integrated various APIs (YouTube, Instagram, etc.) into web applications for enhanced functionality and user visibility.
- Built customized client dashboards to enhance data visualization.

PROJECTS

Content Writer Website | GitHub | View Live
- Built a full-stack content writer platform using Next.js, TypeScript, Prisma, Cloudinary, shadcn/ui, Jest, and Figma with an admin section, blog editor, resume builder, and portfolio management.

TechSticks | GitHub | View Live
- Created an open-source collaborative tech resource platform with Next.js, TypeScript, shadcn/ui, and Figma, featuring advanced search and bookmark functionalities.

Sneakers | GitHub | View Live
- Developed a feature-rich e-commerce application using the MERN stack with a design created in Figma and payment integration via Stripe.

Ride Share | GitHub | View Live
- Implemented an Express.js ride-sharing API with user authentication, user profile management, and vehicle creation/update features.
