hikmahyousuph.com | dribbble.com/Hikmahx

SUMMARY

Full-stack developer building scalable SaaS products and AI-powered applications. Skilled in Next.js, Django, and the MERN stack, with expertise in performance, UI/UX, SEO, RAG pipelines, and AI agent workflows.

WORK EXPERIENCE

Freelance

Remote

Full-stack Developer

Aug 2025 – Present

- Designed and built full-stack applications for clients, translating requirements into scalable, user-focused solutions.

GitRoll

San Francisco, United States

Frontend Developer

Jul 2024 – Aug 2025

- Delivered GitRoll's blog, SaaS API dashboard, SEO implementation, outreach one-pager, and a custom chat interface for Shrimpy AI, enhancing engagement and usability.
- Designed and implemented responsive UI components used across multiple screens, ensuring better user experience.
- Built an ML-based GitHub issue classifier, providing actionable insights and improving analytics.

StraitPay

London, United Kingdom

Full-stack Developer

Oct 2023 – Mar 2024

- Worked with a cross-functional team to redesign the company website, resulting in improved app accessibility.
- Implemented user authentication, wallet features, and account management flows across the mobile app and web platform.
- Integrated MixPanel into the mobile app to track user behaviour and support data-driven UX improvements.

Co.Lab

Washington, United States

Backend Developer

Nov 2023 – Feb 2024

- Led API development from inception, enabling faster feature delivery and smoother team collaboration.
- Participated in daily stand-ups and meeting coordination, helping the team stay aligned and productive.
- Adapted quickly to evolving requirements, contributing to a final product that exceeded expectations.

Filly Coder

Accra, Ghana

Full-stack Developer

Sep 2022 – Jul 2023

- Collaborated with designers to ensure accurate implementation of UI and project specifications.
- Integrated external APIs (YouTube, Instagram, and others) to enhance user engagement and platform visibility.
- Built custom dashboards for clients to simplify data visualization and improve user decision-making.

PROJECTS

- QuizMe** | [GitHub](#) | [View Live](#) – AI-powered quiz platform built with Next.js, FastAPI, and Supabase, featuring RAG, AI agents for quiz generation and grading, and voice interaction (STT/TTS).
- JobList** | [GitHub](#) | [View Live](#) – Full-stack job listing website built with Vue.js, TypeScript, shadcn, Python, Django, DRF, and Figma. Created a MERN version as well, with RAG pipeline implementation for advanced job search.
- Content Writer Website** | [GitHub](#) | [View Live](#) – Full-stack content writer platform built with Next.js, TypeScript, Prisma, Cloudinary, Shadcn/UI, and Jest. Includes an admin area, blog editor, résumé builder, and portfolio management tools.
- Sneakers** | [GitHub](#) | [View Live](#) – MERN stack e-commerce application with Stripe payment integration, designed with Figma. Includes a user dashboard for tracking order history, managing multiple addresses, and updating account details.
