

HIKMAH YOUSUPH

SOFTWARE ENGINEER

Full-stack Software Engineer with 4+ years of experience across frontend, backend, and AI engineering, collaborating remotely with distributed teams in the US and UK. Skilled in building scalable, production-ready products from design through deployment.

EXPERIENCE

Frontend Developer

Jul 2024 – Aug 2025

GitRoll

San Francisco, United States

- Owned end-to-end design and delivery of GitRoll's public-facing blog, SaaS API dashboard, and a custom AI chat interface for Shrimpy AI from Figma to production
- Implemented responsive, production-ready designs across platforms, ensuring seamless functionality and consistent user experience.
- Built an ML-based GitHub issue classifier, providing actionable insights and improving analytics.

Full-stack Developer

Oct 2023 – Mar 2024

straitPay

London, United Kingdom

- Collaborated with a cross-functional team to redesign the website, increasing mobile accessibility by 30%.
- Implemented user authentication and wallet features, boosting user engagement.
- Leveraged MixPanel for mobile app user analysis, guiding UX enhancements and feature development.

Backend Developer

Nov 2023 – Feb 2024

Co.Lab

Washington, United States

- Led the development of the API from project inception, reducing project timeline by 20%.
- Adapted to changing requirements, resulting in a product that exceeded customer expectations.

Web Developer

Sep 2022 – Jul 2023

Filly Coder

Accra, Ghana

- Collaborated with design and development teams across multiple projects, translating requirements into functional web features.
- Integrated APIs (YouTube, Instagram, etc.) into web applications for enhanced functionality.
- Built customized client dashboards, improving data visualization.

PROJECTS

QuizMe | [GitHub](#) | [View Live](#)

- Full-stack AI-powered quiz platform built with Next.js, FastAPI, and Supabase, featuring RAG, AI agents for quiz generation and grading, and voice interaction (STT/TTS).

Sneakers | [GitHub](#) | [View Live](#)

- Developed a feature-rich e-commerce application using the MERN stack with design created in Figma and payment integration via Stripe.

Ride Share | [GitHub](#) | [View Live](#)

- Implemented a ride-sharing API with user authentication, user profile management, and vehicle creation/update features.

LearnWell | [GitHub](#)

- Developed a full-stack mobile learning app with React Native and Figma.
